

New fire detection mutual recognition agreement (MRA)

The scope of the fire detection MRA has been extended to include fire extinguishing systems & smoke and heat control systems. Standards now included are:

- EN 12094-3: 2003, Fixed firefighting systems –Components for gas extinguishing systems Part 3: Requirements and test methods for manual triggering and stop devices
- EN 12101-10: 2005 and EN 12101-10/AC: 2007 Smoke and heat control systems - Part 10: Power supplies.

EN 54-12 has been removed from the MRA until full mutual acceptance of test results can be reached.

Updated safes and strongrooms mutual recognition agreement (MRA)

The updated MRA provides additional information about the common certification plate.

Plates can now be inscribed by either VdS or CNPP at the request of the customer.
